WAVESTREAM PRESS RELEASE

Wavestream Ships 5,000th High-Power 50W Ka-Band Block Upconverter to Military Communications Program

United States government awards Wavestream additional multi-million-dollar contract for military communications program

San Dimas, California, November 24, 2020 – Wavestream, a world leader in the design and manufacture of next-generation, high-power solid-state amplifiers, announced today receiving a multi-million-dollar order from the United States Government for a military communication program contract. With this award, Wavestream achieves an industry record shipment milestone by surpassing 5,000 units of its high-power 50W Ka-band military Block Upconverter (BUC) to be delivered to this military program.

"Wavestream is honored to be the vendor of choice for the US government military communication program and to be reliably supplying its high-power 50W Ka-band BUC for over 14 years. This product is the most widely deployed solid state amplifier built at this power level," said Bob Huffman, Wavestream's General Manager. "With this order we have surpassed shipment of 5,000 units, a testament to Wavestream's unmatched production capacity and product longevity of military-grade high-power Ka-Band SSPA/BUCs."

About Wavestream

Wavestream is the industry leader in the design and manufacture of next generation satellite communications high power transceivers for In-Flight Connectivity, Ground Mobility and Gateway markets. Since 2001, we provide system integrators with field-proven, high performance Ka, Ku and X band Solid State Power Amplifiers (SSPAs), Block Upconverters (BUCs), Block Down Converters and Transceivers. We design, manufacture and repair our products in-house and have shipped over 30,000 systems in the past 15 years. Wavestream products provide high quality and reliability under the harshest environmental conditions and we are currently certified to ISO 9001:2008 and AS9100D standards.
