

WAVESTREAM PRESS RELEASE

Wavestream Receives Over \$8 Million Follow-On Order for Support of Low Earth Orbit Constellation

San Dimas, California, June 6, 2022 -- Wavestream, a worldwide leader in the design and manufacture of next-generation, high-power solid-state amplifiers, announced today it received an over \$8 million dollar follow-on order for support of gateways of a Low Earth Orbit (LEO) constellation.

Wavestream was chosen as the sole provider to supply Gateway Solid State Power Amplifiers (SSPAs) to a leading satellite operator to support the LEO constellation gateways. The order is above and beyond last year's previously announced \$50 million contract, which is currently being delivered.

“Repeat business like this is a testament to our reliable manufacturing ability to meet the stringent requirements of non-geostationary satellite orbit constellations,” said Bob Huffman, General Manager at Wavestream. “Our manufacturing capacity, product reliability, and experience with high-power Ka-Band SSPA technologies position us well to capture a significant share of the NGSO gateway market.”

About Wavestream

Wavestream is the industry leader in the design and manufacture of next generation satellite communications high power transceivers for In Flight Connectivity, Ground Mobility and Gateway markets. Since 2001, we provide system integrators with field-proven, high performance Ka, Ku and X band Solid State Power Amplifiers (SSPAs), Block Upconverters (BUCs), Block Down Converters and Transceivers. We design, manufacture and repair our products in-house and have delivered over 40,000 systems in the past 15 years. Wavestream products provide high quality and reliability under the harshest environmental conditions and we are currently certified to ISO 9001:2008 and AS9100D standards.
