

# WAVESTREAM PRESS RELEASE

## Wavestream Awarded Over \$10M to Power IFC Applications of Tier-1 Global Aerospace System Integrator

*Ka-band transceivers from Wavestream will support in-flight connectivity*

**San Dimas, California, October 24, 2022,** -- Wavestream, a worldwide leader in the design and manufacture of next-generation, high-power solid-state amplifiers, announced today the receipt of more than \$10M in orders for transceivers to power the IFC applications of a Tier-1 global aerospace system Integrator.

Wavestream will provide its Ka-band AeroStream™ family of transceiver products to enable in-flight connectivity.

“We are pleased to fulfill the burgeoning demand of our longtime trusted partner who, for years, has continued to rely on our Ka-band transceiver solution for in-flight connectivity,” said Bob Huffman, Wavestream’s General Manager “With these new orders, Wavestream is growing its lead in the IFC marketplace, now with over 3,000 units successfully operating on commercial and business aviation aircraft worldwide.”

### **About Wavestream**

Wavestream is the industry leader in the design and manufacture of next generation satellite communications high power transceivers for In Flight Connectivity, Ground Mobility and Gateway markets. Since 2001, we provide system integrators with field-proven, high performance Ka, Ku and X band Solid State Power Amplifiers (SSPAs), Block Upconverters (BUCs), Block Down Converters and Transceivers. We design, manufacture and repair our products in-house and have delivered over 40,000 systems in the past 15 years. Wavestream products provide high quality and reliability under the harshest environmental conditions and we are currently certified to ISO 9001:2008 and AS9100D standards.
